

Ainsi Per admet une branctu parabolique
de direction (0,3) au Voisinage de +0.

1)
$$\begin{cases}
1 & \text{if } (n) = +\infty \\
1 & \text{if } (n) = +\infty
\end{cases}$$

$$\begin{cases}
1 & \text{if } (n) = +\infty \\
1 & \text{if } (n) = +\infty
\end{cases}$$

$$\begin{cases} \int_{y-x+\infty}^{y-x+\infty} f(u) = -\infty \\ \int_{y-x+\infty}^{y-x+\infty} f(u) = -\infty \end{cases}$$

$$\begin{cases} \int_{n-1}^{\infty} f(n) = +\infty \\ \int_{n-1}^{\infty} f(n) = -\infty \end{cases}$$

$$\begin{cases}
l & f(n) = -\infty \\
l & f(n) = +\infty \\
l & n
\end{cases}$$
